

TRANE®

**MITSUBISHI
ELECTRIC**

M & P Series Application/DSB Educational Workshop

Date: Nov. 19th

8am to 1

Location: Trane Supply

10411 Meridian Center Parkway

#130, Fort Myers FL 33913

This interactive workshop is focused on making Diamond System Builder part of your every-day system design process. This event is designed for HVAC system designers, those who design systems as part of their sales process, and for those who simply want to understand how design impacts system performance.

We will discuss:

How to set up DSB initially

How to design simple single zone systems

How to design multi-zone systems

How to export the system design into a useable report

What's in it for you?

Grow in wisdom regarding Trane-Mitsubishi system design

Set you and your organization apart from those who choose to just "wing it"

Earn points towards your Trane Ductless Pro Status

Opportunity to interact with professionals in our business

Please bring a Windows based laptop or tablet (Mac not supported yet) and have Diamond System Builder installed before the class begins if you can.
